DETAILED ACTION

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the connection between said source or drain of said read transistor and said one of the data lines, and the connection between said write transistor and the claimed storage node must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 have been rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: said "drain region fabricated from metal or a semiconductor material connected by a channel....." and a missing element connected to said drain by the claimed channel.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to PN: 5,646,903 and specifically the three transistors in a cell as shown in figures 3 and 4a.
